Office Action Summary	Application No. 10/577,542	Applicant(s) ANTHONY ET AL.	
	Examiner DIANA J. LIAO	Art Unit 1793	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/12/2009 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 19-36 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 19 and 26 recite a step in a carbonator of at least 700°C and with a carbon dioxide stream of at least 85%. There is no support in the original disclosure for these *ranges* but rather specific examples at one value.

Response to Arguments

4. Applicant's arguments filed 8/12/2009 have been fully considered but they are not persuasive.

Declaration dated 7/9/2009 has been considered.

Applicant argues that the original disclosure would convey to a skilled artisan that the inventors were in possession of the claimed invention, i.e. the claimed temperature ranges of operability. However, there is no disclosed range in the specification. A subgenus range is not necessarily supported by a broader range or by examples.

Applicant argues that the term "concentrated" with regards to the carbon dioxide stream would also convey a concentration of at least 85% carbon dioxide. A declaration was filed to explain that this is the concentration required to shock a sorbent. However, the declaration itself acknowledges that the meaning of "concentrated" varies depending on the field (items 6 and 8), and thus it is not an inherent fact.

Conclusion
